

Самостоятельная работа 4

Выполнил: Славный Даниил Михайлович

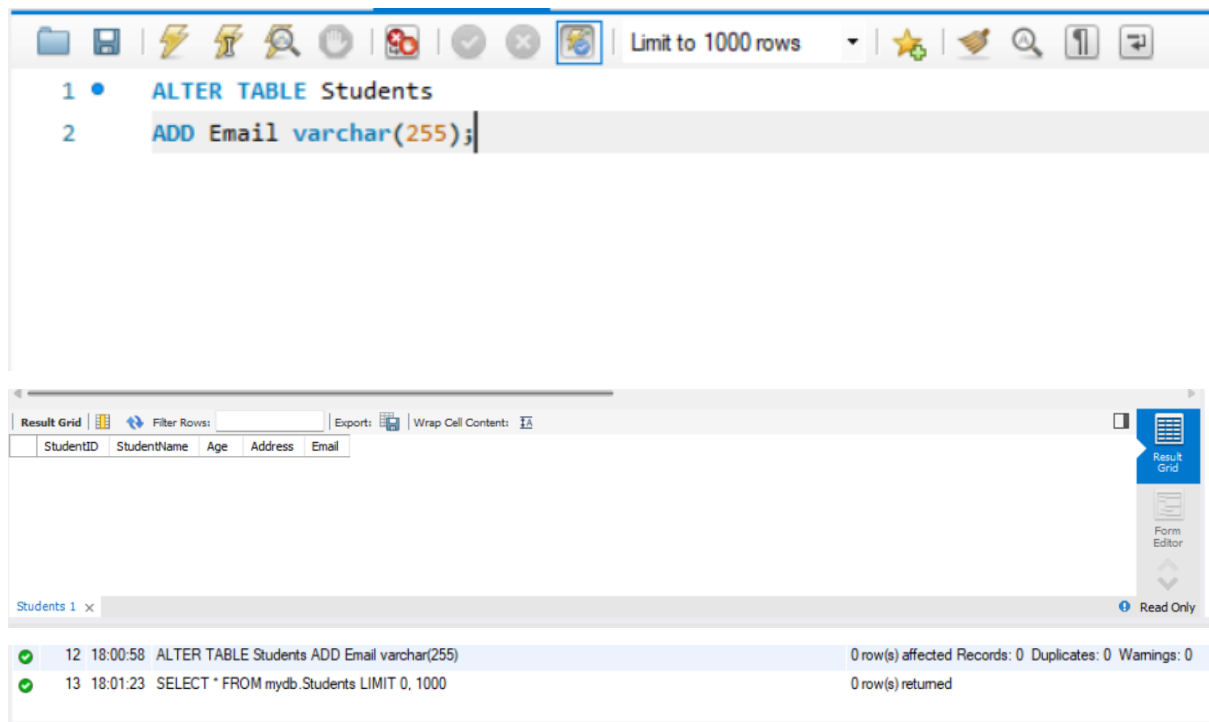

Группа: 1.2

Задание 4.2: Создание, изменение и удаление таблиц

Создали таблицу

Вносим изменения

Удаляем таблицу

The screenshot displays a database management interface. At the top, a toolbar contains various icons for file operations, execution, and search. Below the toolbar, a text input field shows the SQL command `DROP TABLE Students;` with a cursor at the end. A status bar below the command indicates the execution results: a green checkmark, the timestamp `14 18:02:31`, the command `DROP TABLE Students`, the message `0 row(s) affected`, and the execution time `0.016 sec`.

On the left side, a tree view shows the database structure. The `mydb` database is expanded, revealing its contents: `Tables`, `Views`, `Stored Procedures`, and `Functions`. Below `mydb`, the `sys` system database is also visible.
